Seokjin Hong

Pricing Operations · Market Price Research · Process Standardization & Stakeholder Support

PROFESSIONAL SUMMARY

Pricing professional with 3+ years owning B2B pricing strategy and market price research in a data-intensive market. At Kumho Petrochemical I research market and competitor prices, clean and map large customs / trade datasets, and deliver that price intelligence to internal decision-makers so they can negotiate purchase terms and set a customer-optimal price — the same flow Coupang's Primary Mapping team runs at the start of its pricing process.

PROFESSIONAL EXPERIENCE

Kumho Petrochemical Jan 2024 – Present
Overseas Sales Representative, PPG Sales Team

- Own end-to-end PPG pricing across Asia, Japan, Africa, and Europe — ~10 accounts, multiple grades — researching market/competitor prices, cost, and demand to set competitive, margin-protecting prices (~1,000 MT/month at ~\$1,600/MT, ≈ \$19M/yr).
- Research and monitor pricing across ~5 key competitors and Propylene Oxide (PO) movements daily, then deliver this market intelligence to Sales/Production decision-makers — mirroring Primary Mapping's role of feeding market prices to Business Managers before purchase.
- Pre-process, clean, and map large customs / trade datasets to research competitor positioning and market-price levels.
- Standardize and simplify the pricing workflow (reusable templates, automated comparison sheets) to raise productivity and consistency, and proactively propose system / logic improvements to related teams.
- Provide ad-hoc price verification and research to support cross-functional stakeholders' decisions, and compile estimated P&L so each pricing call stays tied to its margin impact.
- Coordinate quarterly cross-functional alignment across four teams (R&D, Sales, Production) and track anti-dumping policy and import/export trends affecting price positioning.

Hanjin Jan 2023 – Sep 2023
Operation Associate

- Managed inbound international shipments and domestic distribution under high-volume, time-sensitive operations while meeting Amazon SLA targets.
- Oversaw on-site operations and handled multilingual stakeholder communication across a cross-border operational environment.

PUBLICATION

“Implications of the Shifting Indian Defense Market for Korea: Focusing on Indo-Russia Relations” First Author · May 2021

Analyzed how Korean defense firms benchmarked Russia's approach to enter the Indian market, comparing capability and policy across the three markets.
